

DOES IT HURT?

Topical anesthetics are applied to the area before and during the procedure. Some people may experience some discomfort. Most clients describe the eyeliner procedure as a "tickling feeling." Those who say they have experienced discomfort or pain, on a scale of 1 to 10 (10 being the highest), most rate their discomfort or pain level at 1-3 (lowest).

HOW LONG WILL IT LAST?

Microdermabrasion, peels, exposure to the sun and etc. will affect longevity. Sun screen is highly recommended. As you become familiar with your new make-up, it is not uncommon to want more. You can freshen up your make-up every couple of years. The darker the color, the longer it will last.

CAN I HAVE A MRI?

HOW SAFE IS THIS PROCEDURE?

New magnetic resonance imaging (MRI) Equipment is very safe and problems are very rare to nonexistent. One hundred thirty five study subjects underwent MR imaging with permanent cosmetics, of these only two individuals experienced "slight tingling" and a sensation of "burning". More information can be found at www.mrisafety.com. Concern about metal aspect; most people have more metal in the fillings in their teeth than they would ever have in tattoo work. Strict sanitation and sterilizations are scrupulously followed in accordance with OSHA & the CDC guidelines and regulations.

HOW MUCH DOES IT COST?

Fees are consistent with quality service delivered in a safe, sanitary manner with a very experienced professional. There is no substitute for experience and reputation. See the price list provided.

COMPLIMENTARY CONSULTATIONS (952) 484-9558

*Consultation will answer questions
& provide information including:*

- Detailed information on procedure(s) you wish
 - Before & after pictures of clients for you to view
- Assessment of enhancing your appearance
 - Discussion of your medical history
 - Before and after care instructions

A conservative approach is taken; it is easy to add more; not as easily removed.

Center for Permanent Cosmetics

While beauty is often considered a reflection from the inside that radiates to the outside; external beauty can build self-confidence, save the time of applying make-up, camouflage imperfections and bring out your best, most attractive features.

ABOUT THE ARTIST & HER COMPANY

Susan is a licensed esthetician and permanent cosmetic artist with experience in traditional tattooing. She is a Certified Permanent Cosmetic Professional (CPCP) and one of only two CPCP's currently in the state of Minnesota certified by the Society of Permanent Cosmetic Professionals (SPCP). The Society of Permanent Cosmetic Professionals (SPCP), presently considered the most prominent professional group in the industry, is known for setting high standards and the best practices. (Go to: www.spcp.org for more information.) Susan is blood borne pathogen certified with the office, inspected and licensed by the City of Shakopee.

EYEBROW

This procedure is done to enhance the appearance of hair in the eyebrows. Whether you want color, shape or both, it allows you freedom from using the eyebrow pencil. You will choose from many shaping/contouring styles and colors. Alopecia sufferers are pleasantly surprised how it looks. It is also great for those who have been scarred in the brow area.

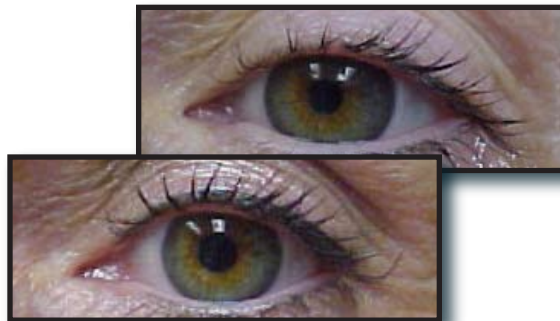

FULL LIP COLOR

Lip tattooing not only provides color, it can also alter the size and shape of the lips. Color can vary from the very soft and subtle to deep, rich and dramatic. It can be used just as it looks or apply your own over the existing permanent color to create new colors.

LASH ENHANCEMENT/EYE LINER

Lash enhancement is a very natural and subtle look. It is done by implanting pigment only in the lash line, making your lashes appear thicker and more lush than they are. For a dramatic look, additional color of your choice is added above the lash enhancement for a more definitive effect. Choose your color and style.

PERMANENT COSMETIC PROCEDURES ARE PROVING TO BE BENEFICIAL TO THOSE WHO:

- Want to look as beautiful as possible and maximize their best features
- Have hair loss from alopecia, chemotherapy, accidents, burns or cosmetic surgery
- Lead active lifestyles
- Have poor eyesight or are physically unable to apply make-up effectively
- Have allergies or sensitive skin
- Wish to correct asymmetrical facial features
- Desire freedom from applying make-up

DEFINITION OF "PERMANENT COSMETICS"

Permanent cosmetic makeup is a procedure that permanently implants pigments into the skin to add color. It defines, or enhances eyebrows, eyelash lines, lip shapes and colors.

Other names for the same procedure are "intradermal pigmentation" and "micropigmentation." Each term means "tattooing." While traditional tattooing art work is done on the body to be seen, admired or to make a statement, cosmetic tattooing when done well, should not be recognized or identified as tattooing.
